The Division of Biostatistics of the Washington University School of Medicine is seeking a highly motivated Statistical Data Analyst with expertise in genetic data management, analysis, and programming. The successful candidate will join a team of biostatisticians and researchers working on a wide variety of collaborative projects in cardiovascular genetics and genetic epidemiology. The primary responsibility will be to conduct data analyses in collaboration with a research team of analysts and investigators. Minimum requirements for the position include:

- Bachelor’s in biostatistics, statistics, bioinformatics, or computer science with training in biostatistics.
- ≥ one year of analytical experience with high-dimensional genetic/genomic data (genome-wide SNPs, transcriptomics, etc.).
- Excellent organizational and good communication skills.
- Working knowledge of MS Windows and Linux/Unix environments.
- Proficiency in R/S-Plus (or SAS), and Perl/Python or similar scripting language.

Preferred Qualifications include a Master’s degree and additional training/experience in cardiovascular genetics or related biomedical research, 2-3 years experience in analyzing genetic/genomic data, and experience with multicenter grants and projects.

Salary is competitive and is commensurate with experience. Review of applicants will start immediately and continue until the position is filled.
